Professional Summary

Robotics and Automation Engineering graduate with hands-on experience in Artificial Intelligence, Machine Learning, Robotics, and software development. Built and deployed AI applications including RAG-based Chatbots, Bank Fraud Detection Systems, Resume Analyzers, Dynamic Pricing Engines, and Supply Chain Forecasting Systems using Python and Streamlit. Skilled in ROS, Arduino, Raspberry Pi, Embedded Systems, IoT, Sensors, CAD Modeling, and automation technologies.

Technical Skills

Programming Languages: Python, Java, C++, SQL

AI & Machine Learning: Machine Learning, NLP, Scikit-learn, Pandas, NumPy, Streamlit, RAG Chatbots

Robotics & Automation: ROS, Arduino, Raspberry Pi, Embedded Systems, IoT, Sensors, Robotics Simulation, Fusion360, CAD

Computer Vision: OpenCV, Image Processing, Object Detection Basics

Web Technologies: HTML, CSS, React

Tools & Platforms: Git, GitHub, VS Code, Streamlit

Experience

AI Intern – Glow Logics

6 Months

Artificial Intelligence Intern

- Developed AI-powered applications using Python, Machine Learning, and NLP techniques.
- Built projects including Bank Fraud Detection Systems, Dynamic Pricing Engines, Supply Chain Forecasting Systems, Resume Analyzers, and RAG-based PDF Chatbots.
- Performed data preprocessing, feature engineering, and model optimization to improve prediction accuracy.
- Designed interactive Streamlit applications and AI deployment workflows for real-time user interaction.
- Collaborated using GitHub version control and software development workflows.

Projects

Ask My PDF Bot (RAG Chatbot) | *Python, Streamlit, LangChain*

- Developed a RAG-based chatbot for answering questions from uploaded PDF documents using semantic search and NLP techniques.

Bank Fraud Detection System | *Python, Scikit-learn, Streamlit*

- Built a machine learning system for fraud transaction detection with real-time analytics dashboard.

Supply Chain Demand Forecasting | *Python, Streamlit, Machine Learning*

- Developed a forecasting system for predicting supply chain demand trends using machine learning and data analytics.

Dynamic Pricing Engine | *Python, Machine Learning*

- Built an AI-based pricing system capable of adjusting product prices dynamically based on market demand and trends.

AI Resume Analyzer | *Python, NLP, Streamlit*

- Created an NLP-powered ATS resume analysis tool with keyword extraction, skill matching, and resume scoring.

Hybrid Quadruped Robot with Wheeled Locomotion | *Robotics, CAD, Fusion360*

- Designed a hybrid robotic system combining wheeled and legged locomotion for improved terrain adaptability and mobility.

Cartesian Coordinate Robot | *Automation, Robotics*

- Designed a Cartesian robotic mechanism for precision-based industrial automation and controlled linear-axis movement.

Education

Visvesvaraya Technological University

2020 – 2026

B.E. in Robotics and Automation Engineering

Govindram Seksaria Science PU College

2020 – 2022

Pre-University Course (PCMB)

Languages

English (Fluent), Kannada (Fluent), Hindi (Fluent)
